FLIXENE™

Vascular Graft

Flixene™ is a "next generation" composite PTFE vascular graft scientifically engineered to instill surgical confidence as it provides the ultimate in strength and durability. Flixene™ is a reinforced trilaminate construction that utilizes Atri proprietary hydrostatic protection membrane. The hydrostatic protection membrane known as HP3™ technology, is specifically designed to reduce weeping and needle hole bleeding. The trilaminate design allows for unparalleled strength, even after repeated needle sticks, along with incredible kink, torque and compression resistance.

VASCULAR GRAFT

Advanta™ SST is a revolutionary ultra-thin composite PTFE vascular graft specifically designed with handling and strength in mind. Advanta™ SST utilizes Atrium's proprietary trilaminate construction, which includes a hydrostatic protection membrane, known as HP3™ technology, which offers reduced weeping and needle hole bleeding. The ultra-thin trilaminate design allows for unparalleled strength, feel and conformability. Advanta™ SST vascular grafts are provided sterile and with reference markings.

REINFORCED
VASCULAR GRAFT

Advanta™ VXT is a reinforced PTFE vascular graft with a hybrid wall architecture. Advanta™ VXT has Atrium's unique Soft-Wrap™ technology which is a highly porous reinforcing film that provides additional radial support. The highly porous reinforcing film is designed to allow more complete tissue penetration into the wall of the graft. Advanta™ VXT vascular grafts are provided sterile and with reference markings.

Advanta™ VS PTFE

Advanta™ VS is a one piece PTFE vascular graft with a hybrid wall architecture. The unique 60/20 wall architecture is designed to allow more rapid and more complete tissue penetration. Advanta™ VS vascular grafts have a feature known as "Vari-Stretch", which allows compression and expansion in the longitudinal direction for easier sizing at the anastomosis. Advanta™ VS vascular grafts are provided sterile and with reference markings.

Products

Vascular Patch

Ultra-Thin Trilaminare PTFE Technology Offers:

- ◆ Incredible Vein-Like Handling and Suturability
- ◆ Superior Strength and Conformability
- ◆ Significantly Reduces Needle Hole Bleeding and Weeping
