The Anatomical Difference

Defect

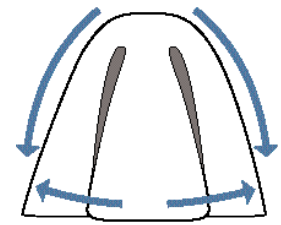

Typical conical shape of an inguinal hernia defect.

Brand B

Pre-formed 3-D plug with multi-pleated channels and a narrow tip.

Atrium

New self-forming design conforms to the anatomical shape and size of the defect following insertion.

- ▶ Exclusive center tab design allows fast, precision placement.
- ▶ Smooth mesh plug wall design may facilitate faster healing.
- ▶ Blunt tip shape enhances plug stability during healing.
- ▶ Patent pending multi-layer design easily tailors to reduce bulk for smaller defects.
- ▶ A full range of plug depths are available to accommodate various size hernia defects.
- ▶ Self-forming plugs come complete with pre-shaped mesh onlay for ultimate cost savings.
